# ***Seaweed for food***

*Get inspired by our seaweed food entrepreneurs and their products*

**■ NORTH SEA FARMERS**

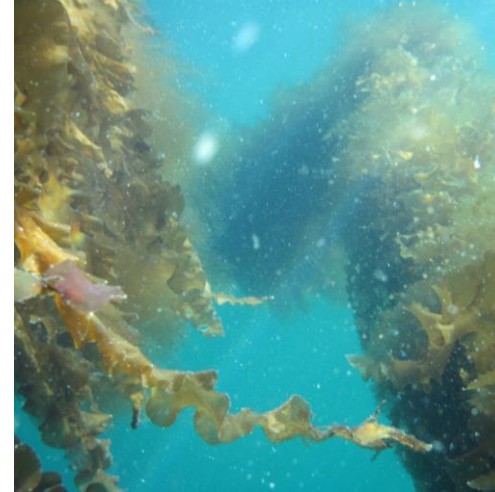

August 2021

# Introduction

As a sector organisation, North Sea Farmers works towards making positive climate impact with seaweed. That is why we encourage the use of locally cultivated seaweeds.

We have many food-related members within our community that have the ambition to work with local seaweed, or already bring amazing products to the market! North Sea Farmers helps these entrepreneurs in making business with seaweed by sharing knowledge and advice (for example in the field of food safety and certification), providing networking opportunities to connect supply and demand, organizing workshops and events and creating exposure.

In this document we proudly present our food entrepreneurs and their seaweed products.
